

Countryside Productivity Small Grant Scheme – The Final Round

The 3rd and final round of the Countryside Productivity Small Grant Scheme (CPSG) has now opened. This grant scheme enables farmers to invest in specific items of equipment which will improve the productivity of the business and benefit the surrounding environment.

The application window closes on the 4th November 2020

The scheme allows farmers to apply for 40% of the standard cost of new equipment (as listed in the guidance) with a minimum grant of £3,000 and up to a maximum of £12,000. The innovative equipment under this scheme ranges from technical efficiency, animal health & welfare, resource efficiency and nutrient management technologies.

Successful claimants under previous CPSG rounds of this scheme, are eligible to apply providing that applicants are not applying for the same items of equipment already purchased and have previously received below £9000 of grant funding. Where applications have been withdrawn in previous rounds, applicants are still eligible to re-apply.

If this is of interest to you, then please do not hesitate to contact us at Madeleys Chartered Surveyors for further information on the scheme and the range of eligible items that can be applied for.
